

# The Consequences of Uneven Development

1. Use an atlas of the internet to find out these measures of development for the UK, USA, Ethiopia and Haiti.
2. Use a red pen to circle the worst country in terms of development for each measure of development.
3. Use a green pen to circle the best country in terms of development for each measure of development.
4. Can you find which country in the world has the best value for each measure of development? Write down the country name and, in brackets, write the value of that measure of development.
5. Can you find which country in the world has the worst value for each measure of development? Write down the country name and, in brackets, write the value of that measure of development.

Wealth	UK	USA	Ethiopia	Haiti	Best Country (value)	Worst Country (value)
GNI per capita						
health						
life expectancy						
infant mortality rates						
death rate						
birth rate						
people per doctor
