Anti- Bullying Campaign

Snapchat:

Snapchat is a mobile app that allows users to capture videos/images and send messages that disappear after a few seconds. It also has a very specific screenshot policy, which means users will be notified if you have taken a screencap of their posts. This allows for better privacy and unfiltered sharing.

Whilst this can be a fun and appealing way to communicate with your friends and loved ones, some people take this as an opportunity to spread rumours, gossip and hateful messages. They feel it's easier to do so because it can be easily 'erased' and harder to trace.

Although the Snaps disappear without a trace, their messages can leave lasting impacts. It is important to think about what you send, before sending it. Ask yourself, is this hurtful? Would I be okay with a trusted adult seeing me send this? If the answer is no, do not send!
